

Sponsors' and Exhibitors' Guide

Sorrento, Italy, 12-16 June 2023

A Great Opportunity for Networking

- This novel Conference combines two internationally recognized and highly successful forums in polyolefin science and technology
- Integrating the 20+ year long tradition of the two individual conferences aims to create a unique multidisciplinary environment for a wider community of academic and industrial professionals

Venue and Program

The conference will be held from 12-16 June 2023 at the Hilton Sorrento Place, in Sorrento Italy. The venue offers top-quality conference facilities integrated with a 4-star hotel, indoor and outdoor swimming pools, and unique possibilities of entertainment. The perfumes and colors of the early Mediterranean summer and the traditional southern Italian cuisine are a top-up in the pause between the morning and afternoon sessions.

The scientific program from Monday June 12 until Friday June 16 will focus on the latest achievements in molecular and heterogeneous olefin polymerization catalysis (covering catalyst design, precatalyst activation and speciation, molecular kinetics, and polymer microstructure and architecture), as well as progress in reactor and process design for various technologies (including highly innovative and/or unconventional ones). The conference will also cover other important topics like High Throughput Experimentation, advanced fast analytics, big data generation and Artificial Intelligence (AI) aided modeling.

In addition to the auditorium for the oral session, ample spaces will be arranged for the poster sessions and the exhibits.

Scientific Board: Prof. Bernhard Rieger (DPI and TU-Munich), Prof. Vincenzo Busico (U-Naples Federico II), Prof. Timothy McKenna (U-Lyon), Prof. Joao Soares. (U-Alberta). Secretary: Dr. Claude Bostoen (DPI)
